- Member OOGA & API
- Committee Member INGAA Foundation

Experience

The Talent Pool is Shallow, the Regulations are Increasing, More Training is Needed, Risks are Increasing. DAN AND THE JOE KNOWS ENERGY TEAM IS FOCUSED ON PROVIDING THE QUALITY ASSURANCE AND CONSTRUCTION MANAGEMENT PROFESSIONALS YOU NEED.

As founder and managing member of Joe Knows Energy, Dan Lorenz provides strategic direction and oversees all aspects of business development, operations, financial management, team recruitment and leadership development.

Focusing on Pipelines and Facilities, Joe Knows Energy provides the Quality Assurance and Construction Management Professionals to tackle the unique challenges facing energy companies active in the Utica and Marcellus Shale region and elsewhere in North America.

Prior to founding Joe Knows Energy, Dan founded and led a full service site development contractor that provided earthwork, survey, concrete and utilities installation services. In addition, Dan led heavy equipment and CDL training facilities and land development, environmental remediation services and logistics management businesses that operated in a multi-state region.

Throughout his more than 30 years of industry experience and company ownership, Dan has exemplified his commitment to excellence, safety, on-time project completion and team success to ensure client satisfaction. Dan has also been awarded the E&Y Entrepreneur of the Year twice. He is currently a committee member on the Interstate Natural Gas Association of America Foundation.

Representative Projects

Athena & Zeus Pipelines – Belmont and Monroe Counties, Ohio

These pipeline projects for Rice Energy, connected CDP4 to the TETCO pipeline. They include 13 miles of 24" and 30" Steel Pipelines and 4 miles of 20" waterline. With winter conditions, steep terrain, condensed schedule, constrained access, slip prone geology, numerous crossings, and multiple contractors, Lorenz focused an inspection team that at peak had 55 members, on the client's goals. He also performed over 200 OQ evaluations.

Utica Fractionation Plant Facility – Harrison County, Ohio

This facility includes eight pads totaling 117,037 SY that were developed for the construction and installation of gas processing equipment, gas storage tanks, gas transmission pipelines, materials laydown areas, electrical substation, flare plus warehousing and storage buildings, a control building and administrative support buildings. An additional 55,633 square yards of haul roads, driveways and parking lots were also developed within the boundaries of the project. The tree-covered 166-acre site was designed around 5.92 acres of wetlands to minimize the time needed for permitting. The earthwork was constructed over 18 weeks from the end of November to March and completed in 122 days with zero safety incidents.
