## Jesse Smith

Construction Management Operational  
Leader

### Areas of Expertise

- Pipeline Construction
- Project Management
- Pipeline Inspection

### Experience

Jesse has more than 35 years of oil and gas experience managing international and domestic pipeline inspection and construction projects.

### Representative Project Experience

**XTO Energy, Construction Manager** - Oversaw planning and construction of XTO's gas gathering system in Butler County, PA. Duties included bidding contractors, overseeing contractors on construction, managing inspectors, and planning future lines.

**TransCanada, Assistant Construction Manager** - \$600m pipeline project

**Momentum Energy, Construction Manager** - Installed gathering system and plant in Louisiana Haynesville field. Total responsibility for survey, materials, and construction.

**Trans Gas Peru, Superintendent/Chief Inspector** - Constructed 1000+ miles of telescoping 28"/32" and 18"/14" pipeline from Camisea, Peru to Pisco, Peru and from Pisco to Lima, Peru. Responsible for Land, Environmental, Safety, and Construction. Estimated extra work, work stoppages, and variances. Used Colombian and Peruvian inspectors. Hired by Hunt Oil Company for this project.

**Hunt Oil Company, Chief Inspector** - In charge of laying main trunk lines and gathering lines to construct and produce Raja, Kamil, and Jannah fields. Central Consolidated Contractors, Inc., was the main contractor on the plants and Saipem on the major pipeline projects; \$380 million project. Furnished the pipeline Inspectors for these projects.

**Tidmore-Smith Contractors, Inc., President** - General Oilfield Construction and Maintenance Service Company pipeline work and facility construction work. Clients included Valero Gas Corp, Transgas Corp., Esperanzo Gas Co., Texas Utilities, Delhi Gas Corp., Enserch Gas Corp., Lone Star Gas, Tejas Gas Corp., Worldwide Energy Corp., Hunt Oil Co., and Exxon. Personally evaluated, estimated, and bid projects, supervised the field and construction, selected ROW, obtained landowner permission to construct, estimated the contract for financing, and obtained the materials for the project, as well as performed the actual construction.

**Hood Corp./National Mechanical Contractors, Inc., Superintendent** - Built the gathering system in Prudhoe Bay, Alaska, for Arco/Exxon on North Slope. Responsibilities included cost engineering and estimating. Built loading facilities in Arctic Ocean to rescue packages from barges from frozen arctic after a premature freeze about a mile from shore.

**Allen Leslie LTD, Manager of Special Projects**- Solicited, estimated, bid, negotiated and started up hook-ups for 5 platforms for Phillips Petroleum in the North Sea Ekofisk field. Solicited, bid, and completed the final commissioning and hook-up of Claymore & Piper platforms for Occidental Petroleum in UK sector of the North Sea. Secured, started up and operated the Maintenance Contracts on all platforms after construction.
